

Overview of the eCSE project

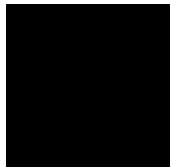

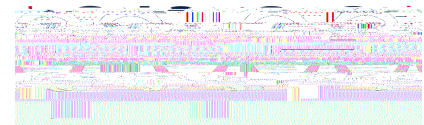

-

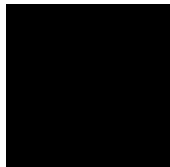

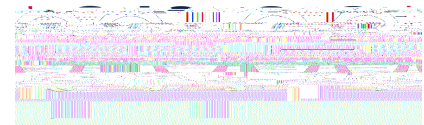

Software & Hardware Requirements

- Subversion client
 - version 1.4.2 or greater

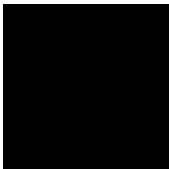

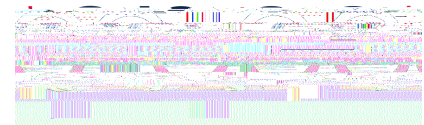

CESM available on many platforms

- CESM currently runs “out of the box” today many machines, including
 - **edison – LBNL Cray XC30**
 -

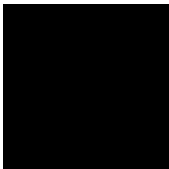

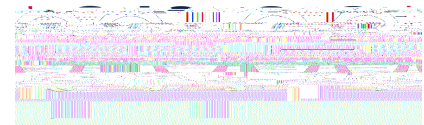

Porting to ARCHER

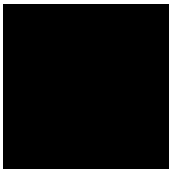

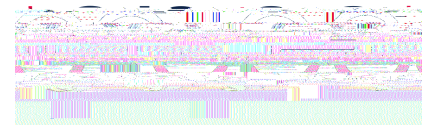

Fixing particular module versions

-

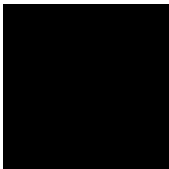

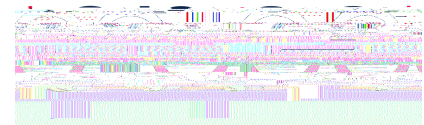

CESM's cprnc tool

-

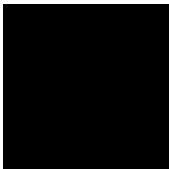

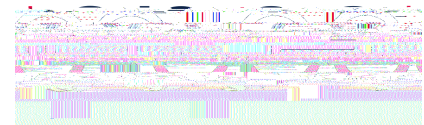

General CESM Porting Observations (2/2)

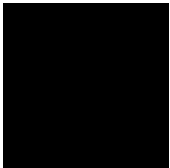

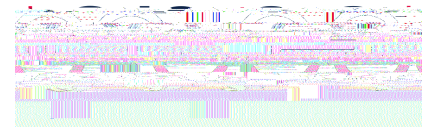

-

Agreed slimmed-down validation

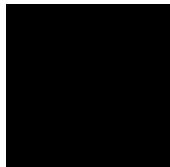

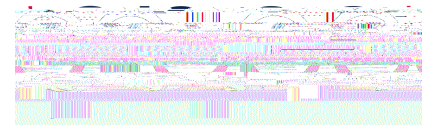

-

User requirements versus Support (1/3)

- Users wished to have 1.0.6 installed, optimised and available

User requirements versus Support (2/3)
